

# CLASS NOTES

How to Produce Music

# 00

## SET-UP GUIDE

### Welcome to the class!

To follow the class and produce your own piece of music, all you need is a computer and preferably a set of speakers or headphones.

Follow the link below or in the class description to download and install your **FREE 30 DAY TRIAL** of Pro Tools:

<https://my.avid.com/get/pro-tools-trial>

It is important to note that different operating systems and computers will vary in set-up so check with the AVID website for any troubleshooting.

You may also need to download your free plugins such as **XPAND** from the AVID LINK installer if they do not automatically install.
